COURSE DESCRIPTION

Collision Repair: Non-Structural is a course that prepares students to analyze non-structural collision damage to a vehicle, determine the extent of the damage and the direction of impact, initiate an appropriate repair plan, and correctly use equipment to fit metal to a specified dimension within tolerances. Course content includes metal finishing, body filling and glass panel replacements. The course prepares students for entry level employment and advanced training in collision repair technology, and post secondary education. Students completing the Collision Repair: Non-Structural are eligible to take the ASE written examination for Non-Structural Analysis and Damage Repair.

Recommended: Transportation Core

Algebra I or Technical Algebra; Physical Science or Principles of Technology I, Principles of Welding (100

hours) (may be concurrent)

Requirement: A minimum of 240 hours must be dedicated to non-

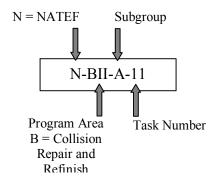

structural analysis and damage repair and 100 hours in MIG welding to meet minimum standards set by NATEF.

Recommended Credits: 2 or 3 (NATEF Certified Program Only)

Recommended Grade Level(s): 10th, 11th or 12th

Number of Competencies in Course: 65 / 84

Notes: Course is aligned with NATEF tasks list for Collision Repair and Refinish - Non Structural Analysis and Damage Repair. Items have been organized based on the requirements of the Tennessee required course description format. NATEF tasks are referenced with the corresponding Performance Standards. Codes are as follows:

COLLISION REPAIR: NON-STRUCTURAL STANDARDS

- **1.0** Students will demonstrate leadership, citizenship, and teamwork skills required for success in the school, community, and workplace.
- **2.0** Students will apply mathematics and science concepts to collision repair and refinish technology.
- 3.0 Students will demonstrate proper procedures for preparing vehicles for repair.
- **4.0** Students will demonstrate proper procedures for making outer body panel repairs, replacements, and adjustments.
- 5.0 Students will demonstrate proper procedures for metal finishing and body filling.
- **6.0** Students will demonstrate proper procedures for moveable glass and hardware.
- 7.0 Students will properly perform welding and cutting techniques for collision repair.
- **8.0** Students will demonstrate communication skills required in the collision repair and refinish industry.
- **9.0** Students will demonstrate interpersonal and employability skills required in the collision repair and refinish industry.
- 10.0 Students will demonstrate safety practices pertaining to collision repair technology, including Occupational Safety and Health Administration (OSHA) and Environmental Protection Agency (EPA) requirements for a collision repair and refinish facility.

STANDARD 1.0

Students will demonstrate leadership, citizenship, and teamwork skills required for success in the school, community, and workplace.

LEARNING EXPECTATIONS

The student will:

- **1.1** Exhibit positive leadership skills.
- **1.2** Participate in SkillsUSA as an integral part of classroom instruction.
- **1.3** Assess situations and apply problem-solving and decision-making skills to situations in the community and workplace.
- 1.4 Demonstrate the ability to work cooperatively with others in a professional setting.

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

The student:

- 1.1 Demonstrates character, leadership, and integrity.
- **1.2A** Applies the points of the creed to personal and professional situations.
- **1.2B** Participates and conducts meetings and other business according to accepted rules of parliamentary procedure.
- **1.3** Analyzes situations in the workplace and uses problem-solving techniques to solve the problem.
- **1.4A** Participates in a community service project.
- **1.4B** Participates in a leadership activity.

SAMPLE PERFORMANCE TASKS

- Create a leadership inventory and use it to conduct a personal assessment.
- Participate in various SkillsUSA programs and/or competitive events.
- Evaluate an activity within the school, community, and/or workplace and project effects of the project.
- Implement an annual program of work.
- Prepare a meeting agenda for a SkillsUSA monthly meeting.
- Attend a professional organization meeting.
- Participate in the American Spirit Award competition with SkillsUSA.

INTEGRATION LINKAGES

SkillsUSA, *Professional Development Program*, SkillsUSA, Communications and Writing Skills, Teambuilding Skills, Research, Language Arts, Sociology, Psychology, Math, Technical Math, English IV: Communication for Life, Social Studies, Problem Solving, Interpersonal Skills, Employability Skills, Critical-Thinking Skills, SCANS (Secretary's Commission on Achieving Necessary Skills), Chamber of Commerce, Colleges, Universities, Technology Centers, and Employment Agencies

STANDARD 2.0

Students will apply mathematics and science concepts to collision repair technology.

LEARNING EXPECTATIONS

The student will:

- 2.1 Relate mathematics to collision repair and refinish technology
- 2.2 Relate scientific concepts to collision repair and refinish technology.
- **2.3** Examine the materials and construction of vehicles.

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

- **2.1A** Estimates the results of basic arithmetic operations, and can accurately round up or down depending on the appropriate rule for the situation.
- **2.1B** Visually formulates an angle, (e.g., suspension system or drive belt) and verifies its conformance to the manufacturer's specified angle.
- **2.1C** Determines if the lines of an automobile are vertical or horizontal as specified in the original design specifications.
- **2.1D** Interprets symbols to determine compliance with the manufacturer's specifications.
- **2.1E** Solves equations using graphical, numerical, and algebraic methods.
- **2.1F** Distinguishes between Fahrenheit and centigrade temperature measurement devices and determines which to use for a specific situation.
- **2.2A** Correlates the following concepts with their role in automotive collision repair technology:
 - heat transfer
- force (in relation to realignment)
- conduction
- Newton's laws of motion
- radiation
- energy conversion
- convection
- heat energy
- expansion
- the three states of matter
- contraction
- **2.2B** Analyzes the characteristics and implements safety requirements of solvents used in an collision repair and refinish facility.
- **2.2C** Examines the following automotive applications of acoustics:
 - how sound generated in one place in the body and engine can be carried to other parts of the engine through metal and other materials.
 - how the frequency of the sound relates to a normal or abnormally operating system.
 - why a specific noise sounds different depending on the acoustics of the vehicle.
 - what happens when an object resonates.
- **2.2D** Uses a scale to measure component weight in order to balance rotating systems.
- **2.2E** Illustrates how an applied force at one location can be transmitted via fluid pressure to provide a force at a remote location on the vehicle.
- **2.2F** Analyzes how heat affects the different strengths of metal.
- **2.3A** Compares the different types of construction for unibody and body-over-frame vehicles.
- **2.3B** Illustrates how vehicles are assembled and how net unit build and coining are used to fit body panels.

- **2.3**C Distinguishes the different types of materials used for vehicle construction.
- **2.3D** Assesses the importance of restoring vehicle dimensions.
- **2.3E** Examines how cams, pulleys, and levers are used to multiply force or transfer directions of force in a mechanical system.
- **2.3F** Characterizes new materials and the uses and characteristics of known materials.

- Demonstrate safety procedure for handling solvents.
- Diagram the construction of a body-over-frame vehicle.
- Explain how a piece of equipment used in body repair employs physics concepts in its operation.

INTEGRATION LINKAGES

STANDARD 3.0

Students will demonstrate proper procedures for preparing vehicles for repair.

LEARNING EXPECTATIONS

The student will:

- 3.1 Review damage report and analyze damage to determine appropriate methods for overall repair; develop and document a repair plan. HP-I
- 3.2 Inspect, remove, store, and replace exterior trim and moldings. HP-I
- 3.3 Inspect, remove, store, and replace interior trim and components. HP-I
- 3.4 Inspect, remove, store, and replace non-structural body panels and components that may interfere with or be damaged during repair. HP-I
- 3.5 Inspect, remove, store, and replace all vehicle mechanical and electrical components that may interfere with or be damaged during repair. HP-G
- **3.6** Protect panels, glass, and parts adjacent to the repair area. HP-G
- 3.7 Soap and water wash entire vehicle; use appropriate cleaner to remove contaminants from those areas to be repaired. HP-I
- 3.8 Remove corrosion protection, undercoatings, sealers, and other protective coatings necessary to perform repairs. HP-I
- 3.9 Inspect, remove, and replace repairable plastics and other components that are recommended for off-vehicle repair. HP-G
- **3.10** Apply safety procedures associated with vehicle components and systems according to manufacturers specifications/procedures. HP-I
- **3.11** Apply environmental practices associated with vehicle components and systems such as substrates, fluids, refrigerants, batteries, etc. HP-I

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

- 3.1 Reviews damage report and analyzes damage to determine appropriate methods for Overall repair; develop and document a repair plan. N-BII-A-1
- 3.2 Inspects, removes, stores, and replaces exterior trim and moldings. N-BII-A-2
- 3.3 Inspects, removes, stores, and replaces interior trim and components. N-BII-A-3
- 3.4 Inspects, removes, stores, and replaces non-structural body panels and components that may interfere with or be damaged during repair. N-BII-A-4
- 3.5 Inspects, removes, stores, and replaces all vehicle mechanical and electrical components that may interfere with or be damaged during repair. N-BII-A-5
- 3.6 Protects panels, glass, and parts adjacent to the repair area. N-BII-A-6
- 3.7 Soap and water washes entire vehicle; use appropriate cleaner to remove contaminants from those areas to be repaired. N-BII-A-7
- 3.8 Removes corrosion protection, undercoatings, sealers, and other protective coatings necessary to perform repairs. N-BII-A-8
- 3.9 Inspects, removes, and replaces repairable plastics and other components that are recommended for off-vehicle repair. N-BII-A-9

- **3.10** Applies safety procedures associated with vehicle components and systems according to manufacturers specifications/procedures. N-BII-A-10
- **3.11** Applies environmental practices associated with vehicle components and systems such as substrates, fluids, refrigerants, batteries, etc. N-BII-A-11

- Develop a repair plan for a damaged vehicle.
- Remove any components that might be damaged during repair.

INTEGRATION LINKAGES

STANDARD 4.0

Students will demonstrate proper procedures for making outer body panel repairs, replacements, and adjustments.

LEARNING EXPECTATIONS

The student will:

- **4.1** Determine the extent of direct and indirect damage and direction of impact; develop and document a repair plan. HP-I
- 4.2 Inspect, remove and replace bolted, bonded, and welded steel panel or panel assemblies. HP-I
- **4.3** Determine the extent of damage to aluminum body panels; repair or replace in accordance with manufacturer's specifications. HP-G
- **4.4** Inspect, remove, replace, and align hood, hood hinges, and hood latch. HP-I
- **4.5** Inspect, remove, replace, and align deck lid, lid hinges, and lid latch. HP-I
- **4.6** Inspect, remove, replace, and align doors, tailgates, hatches, lift gates, latches, hinges, and related hardware. HP-I
- **4.7** Inspect, remove, replace, and align bumper bars, covers, reinforcement, guards, isolators, and mounting hardware. HP-I
- **4.8** Inspect, remove, replace and align front fenders, headers, and other panels. HP-I
- **4.9** Straighten and rough-out contours of damaged panels to a suitable condition for body filling or metal finishing using power tools, hand tools, and weld-on pull attachments. HP-I
- **4.10** Weld damaged or torn steel body panels; repair broken welds. HP-I
- **4.11** Restore corrosion protection. HP-I
- **4.12** Replace door skins according to manufacturer's procedures. HP-G
- **4.13** Restore sound deadeners and foam materials. HP-G
- **4.14** Perform panel bonding according to manufacturer's specifications. HP-G
- **4.15** Diagnose and repair water leaks, dust leaks, and wind noise. HP-G

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

- **4.1** Determines the extent of direct and indirect damage and direction of impact; develop and document a repair plan. N-BII-B-1
- **4.2** Inspects, removes and replaces bolted, bonded, and welded steel panel or panel assemblies. N-BII-B-2
- **4.3** Determines the extent of damage to aluminum body panels; repairs or replaces in accordance with manufacturer's specifications. N-BII-B-3
- **4.4** Inspects, removes, replaces, and aligns hood, hood hinges, and hood latch. N-BII-B-4
- 4.5 Inspects, removes, replaces, and aligns deck lid, lid hinges, and lid latch. HP-BII-B-5
- **4.6** Inspects, removes, replaces, and aligns doors, tailgates, hatches, lift gates, latches, hinges, and related hardware. N-BII-B6

- **4.7** Inspects, removes, replaces, and aligns bumper bars, covers, reinforcement, guards, isolators, and mounting hardware. N-BII-B-7
- **4.8** Inspects, removes, replaces and aligns front fenders, headers, and other panels. N-BII-B-8
- **4.9** Straightens and roughs-out contours of damaged panels to a suitable condition for body filling or metal finishing using power tools, hand tools, and weld-on pull attachments. N-BII-B-9
- **4.10** Welds damaged or torn steel body panels; repair broken welds. N-BII-B-10
- **4.11** Restores corrosion protection. N-BII-B-11
- **4.12** Replaces door skins according to manufacturer's procedures. N-BII-B-12
- **4.13** Restores sound deadeners and foam materials. N-BII-B-13
- **4.14** Performs panel bonding according to manufacturer's specifications. N-BII-B-14
- 4.15 Diagnoses and repair water leaks, dust leaks, and wind noise. N-BII-B-15

- Examine a vehicle involved in a collision. Determine the extent of all outer body damage. Develop a strategy for repairing damage.
- Repair damaged steel body panel.

INTEGRATION LINKAGES

STANDARD 5.0

Students will demonstrate proper procedures for metal finishing, body filling, and moveable glass and hardware repair or replacement.

LEARNING EXPECTATIONS

The student will:

- **5.1** Remove paint from the damaged area of a body panel. HP-I
- 5.2 Locate and reduce surface irregularities on a damaged body panel. HP-I
- **5.3** Demonstrate hammer and dolly techniques. HP-I
- 5.4 Heat shrink stretched panel areas to proper contour according to manufacturer's specifications. HP-G
- 5.5 Cold shrink stretched panel areas to proper contour. HP-G
- **5.6** Mix body filler. HP-I
- 5.7 Apply body filler; shape during curing. HP-I
- **5.8** Rough sand cured body filler to contour; finish sand. HP-I

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

The student:

- **5.1** Removes paint from the damaged area of a body panel. N-BII-C-1
- **5.2** Locates and reduces surface irregularities on a damaged body panel. N-BII-C-2
- **5.3** Demonstrates hammer and dolly techniques. N-BII-C-3
- **5.4** Heat shrinks stretched panel areas to proper contour according to manufacturer's specifications. N-BII-C-4
- 5.5 Cold shrinks stretched panel areas to proper contour. N-BII-C-5
- **5.6** Mixes body filler. N-BII-C-6
- **5.7** Applies body filler; shapes during curing. N-BII-C-7
- **5.8** Rough sands cured body filler to contour; finish sand. N-BII-C-8

SAMPLE PERFORMANCE TASKS

- Heat shrink a stretched panel area.
- Determine need for body filler on a damaged vehicle. Apply body filler to damaged area.

INTEGRATION LINKAGES

STANDARD 6.0:

Students will demonstrate proper procedures for moveable glass and hardware.

LEARNING EXPECTATIONS

The student will:

- **6.1** Inspect, adjust, repair or replace window regulators, run channels, glass, power mechanisms, and related controls. HP-G
- **6.2** Diagnose and repair water leaks, dust leaks, and wind noises; inspect, repair, and replace weather-stripping. HP-G
- **6.3** Inspect, repair or replace, and adjust removable, manually or power operated roof panel and hinges, latches, guides, handles, retainer, and controls of sunroofs. HP-G
- **6.4** Inspect, remove, reinstall, and align convertible top and related mechanisms. HP-G

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

The student:

- 6.1 Inspects, adjusts, repairs or replaces window regulators, run channels, glass, power mechanisms, and related controls. N-BII-D-1
- 6.2 Diagnoses and repairs water leaks, dust leaks, and wind noises; inspects, repairs, and replaces weather-stripping. N-BII-D-2
- 6.3 Inspects, repairs or replaces, and adjusts removable, manually or power operated roof panel and hinges, latches, guides, handles, retainer, and controls of sunroofs. N-BII-D-3
- **6.4** Inspects, removes, reinstalls, and aligns convertible top and related mechanisms. N-BII-D-4

INTEGRATION LINKAGES

STANDARD 7.0

Students will properly perform welding and cutting techniques for collision repair.

LEARNING EXPECTATIONS

The student will:

- 7.1 Identify weldable and non-weldable materials used in collision repair. HP-I
- **7.2** Weld and cut high-strength steel and other steels using manufacturer's specifications/procedures. HP-I
- 7.3 Weld and cut aluminum using manufacturer's specifications/procedures. HP-G
- 7.4 Determine the correct welder type, electrode, wire type, diameter, and gas to be used in a specific welding situation. HP-I
- 7.5 Set up and adjust the GMAW (MIG) welder to "tune" for proper electrode stickout, voltage, polarity, flow rate, and wire-feed speed required for the material being welded. HP-I
- **7.6** Store, handle, and install high-pressure gas cylinders. HP-I
- 7.7 Determine work clamp (ground) location and attach. HP-I
- 7.8 Use the proper angle of the gun to the joint and direction of gun travel for the type of weld being made in the flat, horizontal, vertical, and overhead positions. HP-I
- **7.9** Protect adjacent panels, glass, vehicle interior, etc. from welding and cutting operations. HP-I
- **7.10** Protect computers and other electronic control modules during welding procedures according to manufacturer's specifications. HP-I
- 7.11 Clean and prepare the metal to be welded, assure good metal fit-up, apply weld- through primer if necessary, and clamp as required. HP-I
- **7.12** Determine the joint type (butt weld with backing, lap, etc.) for weld being made according to manufacturer's/industry specifications. HP-I
- 7.13 Determine the type of weld (continuous, butt weld with backing, plug, etc.) for each specific welding operation according to manufacturer's/industry specifications. HP-I
- **7.14** Perform the following welds: continuous, stitch, tack, plug, butt weld with and without backing, and lap joints. HP-I
- 7.15 Perform visual and destructive tests on each weld type. HP-I
- 7.16 Identify the causes of various welding defects; make necessary adjustments. HP-I
- 7.17 Identify cause of contact tip burn-back and failure of wire to feed; make necessary adjustments. HP-I
- **7.18** Identify cutting process for different materials and locations in accordance with manufacturer's procedures; perform cutting operation. HP-G
- 7.19 Identify the types of plastics; determine repairability. HP-I
- **7.20** Identify the types of plastics repair procedures; clean and prepare the surface of plastic parts. HP-G
- **7.21** Replace or repair rigid, semi-rigid, and flexible plastic panels according to manufacturer's/industry specifications. HP-G

- **7.22** Remove or repair damaged areas from rigid exterior sheet-molded compound (SMC) panels. HP-G
- **7.23** Replace bonded sheet-molded compound (SMC) body panels; straighten or align panel supports. HP-G

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

- 7.1 Identifies weldable and non-weldable materials used in collision repair. N-BII-E-1
- **7.2** Welds and cuts high-strength steel and other steels using manufacturer's specifications/procedures. N-BII-E-2
- 7.3 Welds and cuts aluminum using manufacturer's specifications/procedures. N-BII-E-3
- 7.4 Determines the correct welder type, electrode, wire type, diameter, and gas to be used in a specific welding situation. N-BII-E-4
- 7.5 Sets up and adjusts the GMAW (MIG) welder to "tune" for proper electrode stickout, voltage, polarity, flow rate, and wire-feed speed required for the material being welded. N-BII-5
- 7.6 Stores, handles, and installs high-pressure gas cylinders. N-BII-E-6
- 7.7 Determines work clamp (ground) location and attachs. N-BII-E-7
- 7.8 Uses the proper angle of the gun to the joint and direction of gun travel for the type of weld being made in the flat, horizontal, vertical, and overhead positions. N-BII-E-8
- **7.9** Protects adjacent panels, glass, vehicle interior, etc. from welding and cutting operations. N-BII-E-9
- **7.10** Protects computers and other electronic control modules during welding procedures according to manufacturer's specifications. N-BII-E-10
- 7.11 Cleans and prepares the metal to be welded, assure good metal fit-up, apply weld-through primer if necessary, and clamp as required. N-BII-E-11
- 7.12 Determines the joint type (butt weld with backing, lap, etc.) for weld being made according to manufacturer's/industry specifications. N-BII-E-12
- 7.13 Determines the type of weld (continuous, butt weld with backing, plug, etc.) for each specific welding operation according to manufacturer's/industry specifications.

 N-BII-E-13
- **7.14** Performs the following welds: continuous, stitch, tack, plug, butt weld with and without backing, and lap joints. N-BII-E-14
- **7.15** Performs visual and destructive tests on each weld type. N-BII-E-15
- 7.16 Identifies the causes of various welding defects; make necessary adjustments. N-BII-E-16
- **7.17** Identifies cause of contact tip burn-back and failure of wire to feed; make necessary adjustments. N-BII-E-17
- **7.18** Identifies cutting process for different materials and locations in accordance with manufacturer's procedures; perform cutting operation. N-BII-E-18
- 7.19 Identifies the types of plastics; determine reparability. N-BII-F-1
- **7.20** Identifies the types of plastics repair procedures; clean and prepare the surface of plastic parts. N-BII-F-2
- **7.21** Replaces or repairs rigid, semi-rigid, and flexible plastic panels according to manufacturer's/industry specifications. N-BII-F-3

- **7.22** Removes or repairs damaged areas from rigid exterior sheet-molded compound (SMC) panels. N-BII-F-4
- **7.23** Replaces bonded sheet-molded compound (SMC) body panels; straightens or aligns panel supports. N-BII-F-5

• In a team, determine need for welding operations for a damaged vehicle. Prepare work area for the appropriate welding operation. Correctly demonstrate the weld.

INTEGRATION LINKAGES

STANDARD 8.0

Students will demonstrate communication skills required in the collision repair and refinish industry.

LEARNING EXPECTATIONS

The student will:

- **8.1** Communicate and comprehend oral and written information typically pertaining to non-structural analysis and damage repair.
- 8.2 Solve non-structural repair problems and make decisions using a logical process.
- **8.3** Use teamwork skills to accomplish goals, solve problems, and manage conflict within groups.

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

The student:

- **8.1A** Interprets and uses written information in common job formats, such as tables, charts, and reference materials and manuals relating to metals, compounds, and plastics relating to non-structural damage repair.
- **8.1B** Interprets and uses graphical information such as blueprints, electrical schematics, process control schematics, automotive flow diagrams, and other automotive diagrams.
- **8.1C** Uses electronic resources to obtain information on repaired vehicles.
- **8.1D** Analyzes information obtained from various sources to determine a diagnostic approach.
- **8.1E** Communicates clearly and appropriately in oral and written form.
- **8.2A** Develops a hypothesis regarding the cause of a non-structural repair problem.
- **8.2B** Tests the hypothesis to determine the solution to the non-structural repair problem.
- **8.2**C Creates, evaluates, and revises as needed a plan to resolve a problem in the classroom or workplace.
- **8.3A** Serves in each of the functional roles of a team.
- **8.3B** Resolves conflicts within a group.
- **8.3C** Demonstrates appropriate and positive examples of giving and accepting criticism.
- **8.3D** Modifies behavior or revises work based on appropriate criticism.
- **8.3E** Solves problems in cooperation with other members of a group.
- **8.3F** Evaluates the role of the non-structural analysis and repair technician within the organizational system.

SAMPLE PERFORMANCE TASKS

- Use reference materials to determine procedures for non-structural analysis and damage repair.
- Work as a team member to develop an analytical strategy.
- Use blueprints and diagrams to execute a task.

INTEGRATION LINKAGES

Communication Skills, Teamwork Skills, Computer Skills, Reading and Writing Skills, Language Arts, Problem Solving, Interpersonal Skills, Employability Skills, Critical-Thinking Skills, SCANS (Secretary's Commission on Achieving Necessary Skills), National Institute for Automotive Service Excellence, National Automotive Technician Education Foundation, SkillsUSA, AYES curriculum

STANDARD 9.0

Students will demonstrate interpersonal and employability skills required in the collision repair and refinish industry.

LEARNING EXPECTATIONS

The student will:

- **9.1** Analyze relationships between work ethics, organizational skills, and personal job success.
- **9.2** Demonstrate attitudes conducive to working in a team.
- **9.3** Compare the correlation between a clean orderly work environment and successful and efficient job performance.
- **9.4** Assess implications of diversity for communities and workplaces.
- **9.5** Develop individual time management and work sequencing skills.

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

- **9.1A** Illustrates the concept of a "work ethic."
- **9.1B** Assesses the potential impact of an individual's work ethic on an organizational system.
- **9.1C** Infers the relationship between work ethics and personal job success.
- **9.2A** Judges which attitudes are conducive to success.
- **9.2B** Modifies behavior to reflect attitudes for success.
- **9.3A** Keeps work area organized and free from clutter and maintains tool and equipment control.
- **9.3B** Cleans work area according to shop standard and NATEF, and OSHA requirements.
- **9.3C** Maintains a neat and orderly work area.
- **9.4A** Points out benefits and problems that may arise from diversity in manufacturers.
- **9.4B** Devises solutions to problems arising from diversity in individuals, cultures, and manufacturers.
- **9.4C** Demonstrates proper dress and grooming for work in a collision repair and refinish facility.
- **9.5A** Assesses the benefits of incorporating time management principles into non-structural analysis and damage repair.
- **9.5B** Displays time management and work sequencing skills.

SAMPLE PERFORMANCE TASKS

- Maintain an orderly work area.
- Consistently arrive at class on time.
- Serve as an intern with a dealership or fleet shop.
- Resolve an interpersonal conflict in the classroom.

INTEGRATION LINKAGES

Math, Science, Communication Skills, Teamwork Skills, Reading Skills, Leadership Skills, Secretary's Commission on Achieving Necessary Skills, National Institute for Automotive Service Excellence, National Automotive Technician Education Foundation, Occupational Safety and Health Administration, Environmental Protection Agency, SkillsUSA, AYES curriculum

STANDARD 10.0

Students will demonstrate safety practices pertaining to collision repair technology, including Occupational Safety and Health Administration (OSHA) and Environmental Protection Agency (EPA) requirements for a collision repair and refinish facility.

LEARNING EXPECTATIONS

The student will:

- **10.1** Determine the safe and correct application for chemicals used in a collision repair and refinish facility.
- **10.2** Use protective clothing and safety equipment.
- 10.3 Use fire protection equipment.
- **10.4** Follow OSHA and EPA regulations affecting collision repair and refinish technology.
- 10.5 Respond to safety communications pertaining to non-structural damage repair.
- 10.6 Passes with 100% accuracy a written examination relating specifically to non-structural analysis and damage repair safety issues.
- **10.7** Passes with 100% accuracy a performance examination relating specifically to non-structural analysis and damage repair tools and equipment.
- 10.8 Maintains a portfolio record of written safety examinations and equipment examinations for which the student has passed an operational checkout by the instructor

PERFORMANCE STANDARDS: EVIDENCE STANDARD IS MET

- **10.1A** Conforms to federal, state, and local regulations when handling, storing, and disposing of chemicals.
- **10.1B** Ensures proper ventilation for chemical and dust.
- **10.1C** Locates first aid supplies.
- **10.2A** Demonstrates proper usage of special safety equipment.
- **10.2B** Selects and uses the appropriate protective clothing for a given task.
- **10.2C** Demonstrates eve, respiration, and skin protection.
- **10.3A** Distinguishes the proper fire extinguisher for each class of fire.
- **10.3B** Demonstrates the proper use of a fire extinguisher.
- **10.4A** Locates regulatory information.
- **10.4B** Extracts information from Material Safety Data Sheets pertaining to shop chemicals.
- **10.4C** Complies with relevant regulations and standards.
- **10.5A** Interprets safety communications from manufacturers and takes action to insure a safe working environment.
- **10.5B** Complies with safety signs and symbols.
- 10.6 Passes with 100% accuracy a written examination relating specifically to non-structural analysis and damage repair safety issues.

- **10.7** Passes with 100% accuracy a performance examination relating specifically to non-structural analysis and damage repair tools and equipment.
- 10.8 Maintains a portfolio record of written safety examinations and equipment examinations for which the student has passed an operational checkout by the instructor.

- Assess the work area for safety hazards.
- Design a corrections program for identified hazards.
- Model the appropriate protective equipment for an assigned task.
